Sakar Chauhan

Founding Engineer @ Adopt.ai | Full Stack Developer | Ex- Paytm
Bengaluru, Karnataka, India

Summary

I am a seasoned full-stack developer with over 4 years of experience in product-based companies, specializing in frontend development while also proficient in backend coding. My expertise lies in crafting software solutions to solve complex problems. From frontend design to backend architecture, I excel in leveraging cutting-edge technologies to deliver robust and scalable systems. I thrive in collaborative environments, where I synergize with teams to innovate and bring ideas to life. Passionate about continuous learning, I stay updated with the latest industry trends to ensure my solutions are at the forefront of innovation. With a track record of success and a commitment to excellence, I am ready to make a meaningful impact on any project. Let's collaborate and turn your visions into reality.

Experience

Adopt AI

Founding Engineer

February 2025 - Present (1 year 8 months)

Bengaluru, Karnataka, India

Novatr

1 year 9 months

Senior Software Engineer

October 2024 - February 2025 (5 months)

Gurugram

- Developed email workflow to engage inactive users, resulting in 20 percent of activations to date.
- Implemented Role-Based Access Control (RBAC) and mentored junior team members.
- Established complete admin tools.

Software Engineer

June 2023 - October 2024 (1 year 5 months)

Gurugram, Haryana, India

- Developed a learner management system for 12000 active users, enabling session attendance, video viewing, quizzes, and assignment submissions.
- Implemented a platform for mentors to earn and access assignments, fostering a collaborative learning environment.
- Created a query platform for mentors and learners to discuss queries and share files, enhancing communication and knowledge sharing.

RARA NOW

Software Engineer

July 2022 - June 2023 (1 year)

India

Seller Panel : Responsive Web App for social sellers, MSMEs to Schedule Orders for Instant Delivery, Track Order, withdraw COD Money and more.

Single-handed developed from scratch by designing frontend architecture, used Next.js, Redux Toolkit, RTK Query, React Bootstrap and SCSS.

Implemented RTK Query to cache api data on user device.

Admin Panel : Created a custom client dashboard that integrates all the microservices with an agile team of 5 developers.

Business Dashboard : Dashboard for Business to see Order details , status , assigned driver and more.

Paytm

1 year 7 months

Frontend Developer

June 2021 - July 2022 (1 year 2 months)

Noida, Uttar Pradesh, India

BOSS Panel : Dashboard used by Helpdesk team to help 20M+ Paytm Merchants resolve query related to transactions, settlement, IOT Devices , +100 more.

Build custom and higher order component using JS and React hooks ,which reduces development process by 30%.

Improved User Experience by implementing search functionality that helped in saving average 15s per visit.

Frontend Developer

January 2021 - June 2021 (6 months)

Noida, Uttar Pradesh, India

Learn fundamentals of JavaScript.

Created Generic Output Component that helped FE developers to populate data directly from api response without any efforts.

Fetching data through apis and showing to users in different formats like paginated tables.

Restricted pages as per the Roles and Permissions assigned to the user.

Refactored legacy code by migrating Class based Components to Functional based Components.

Added test cases using jestjs.io and Enzyme.js took code coverage of legacy code from 5% to 35%.

Education

National institute of technology Agartala

B.tech, Electrical Engineering · (2017 - 2021)

Doon International School

Computer Science · (April 2014 - March 2016)
